

BPM Contents Page

Setting up your grove

- 1) Site Selection
 - a) Region – District
 - b) Site

- 2) Site Planning

- 3) Site preparation

- 4) Cultivar Selection
 - a) Introduction
 - b) Methodology
 - c) Survey Results
 - d) A national perspective
 - e) Top and Bottom 10

The biology of an olive tree

Environmental Factors

- 5) Air
 - a) Nature of wind
 - b) Shelter Belt Design and Maintenance
 - i) Shelterbelts and plants
 - ii) Shelterbelts and disease
 - iii) Shelterbelts and freak winds
 - iv) Shelterbelts and birds
 - v) Shelterbelts and staking
 - vi) Shelterbelts and practicalities

- 6) Frost
 - a) Air Temperature
 - b) Frosting
 - c) Frost Damage
 - d) Avoiding Frost (passive)
 - e) Fighting Frosts (active)
 - f) Predicting Frost

7) Earth

- a) Soil and Climate
 - i) Wet Feet
 - ii) High Vigour
 - iii) Excess Vigour
 - iv) Vigour control
- b) Soil and Roots
- c) Soil Remediation
- d) Soil sustainability
- e) Magic Bullets
- f) Organic Matter
- g) Gypsum

8) Water and Irrigation

- a) Water and life
- b) Water as a nutrient
- c) Water use efficiency
- d) Some water-plant basics
- e) Soil water, soil air and soil particle size
- f) Assessing tree water requirements
- g) Soil water balance
- h) The methods
 - i) Water Balance (50% PET) – Method #1
 - ii) Water Balance (Rain & PET) – Method #2
 - iii) Soil Water measurements – Method #3
- i) Resilience
- j) How much, how often
- k) Rooting volume
- l) Soil-Water content
- m) The Practicalities
- n) Other issues
 - i) Calibration
 - ii) Water stress and phenology
 - iii) Irrigation design
 - iv) Drippers v. sprinklers
 - v) Irrigation dependence
 - vi) Water usage by the understory

Cultural Factors

9) Trees

- a) Introduction
- b) Production process
 - i) Some biological preliminaries
 - ii) Propagation
- c) Quality criteria

10) Planting and staking

11) Plant Nutrition

- a) Mineral Deficiencies
- b) Interpretation
- c) Organics
- d) Phases

12) Canopy

- a) Introduction
- b) Sustainability
- c) Accident and OOS
- d) Pruning Hygiene
- e) Aims of canopy management
- f) Pruning – the economic practicalities
- g) Pruning – the underlying principles
- h) Planning

13) Grove Floor

- a) Introduction
- b) Sustainability
- c) The objectives
 - i) Mowed grass inter-row
 - ii) Weed free strip within row
- d) Risk management
- e) Towards a solution – sheep

Pest & Disease Management

14) Birds

15) Arthropod Pests

- a) Preliminaries
- b) The Groupings
- c) Pest Avoidance
- d) Control
- e) Associated threats
- f) No insecticides

g) Further reading

16) Olive diseases

- a) Preliminaries
- b) The importance of disease management
- c) Identify the diseases in your grove
- d) Disease resistance
- e) Disease Avoidance
- f) Further reading
- g) Peacock spot
 - i) The disease
 - ii) Disease management
 - iii) Spraying for peacock spot
 - iv) Avoiding peacock spot
 - v) Conclusion

17) Spraying

- a) Sustainability
- b) Best Practice
- c) Agrichemical usage
- d) Agrichemical Application
- e) Application issues
 - i) Bad mixing
 - ii) Drop-size distribution
 - iii) The weather and spraying
 - iv) Sprayer evaluation

Getting the Fruit off.

18) Harvest Management

- a) Introduction
- b) How much fruit
- c) How much oil? What Oil Quality
- d) Postharvest factors
- e) Grove Factors
- f) Harvest timing
- g) The harvest

19) Intensive Production Systems

- a) Some general comments
 - i) Structural difficulties
 - ii) Technical difficulties
 - iii) Sustainability
- b) In New Zealand?
 - i) The positives
 - ii) The negatives
 - iii) Conclusion

20) The office

- a) Fundamentals
- b) Friends
- c) Foes
- d) Philosophy

21) Understanding frost

- a) Temperature
- b) Frosting
- c) Frost damage
- d) Frost Avoidance

Biology – Floweral initiation, bloom, fruitset, fruit development

22) Water and Life

23) Water-Plant Basics

- a) Phases

24) Water as a nutrient

25) Photosynthesis

26) Water Use Efficiency

27) Yield Components

28) Day Length

- a) Day length, night length, latitude and season

29) Temperature and plants – growing degree days (GDD)

30) Temperature and olives _Growing degree days

31)
