

**2 Stainless Steel 2500 L olive oil tanks for sale \$3000  
+ GST each**

2x 2500L Stainless Steel olive oil tanks. Both custom made for use in olive oil storage from heavy gauge stainless.

Each tank has conical bottom with central bottom drain valve for effective water removal from oil, and conical bottom allows sludge to settle for racking.

Racking valve just below manway.

Full size manway door with rubber seal in good condition. It is easy to climb inside to effectively clean prior to use. We then use a spray ball fitting at the top to clean with caustic soda.

Top 100mm dairy fitting with positive pressure valve. Gas fitting for filling with inert gas. We have used Nitrogen, but Argon could also be used easily.

Fittings are 1 and a half inch dairy fittings on valves. Some fittings available to allow effective blending of 5000L between the 2 tanks. Both tanks can be easily moved when empty with a Jiffy truck.

Price is \$3000 + GST per tank + fittings as required. Shipping is buyers cost.
