

Specially built harvester for olives.

Harvest platform and tine system attach to a Landini DT70F Orchard Tractor which has been fitted out for the purpose. Harvester new in 2007 so only used for 4 harvests.

Can be used with tine system by one person or as a catch and bin system without using tines, and assisted by one or two staff with olive rakes.

A video is available showing it in operation.

Now being sold at way below cost.

Tractor and loader \$30,000

Harvester \$33,000

This is the answer to backbreaking harvesting with the bonus of getting a great tractor for mowing, spraying and other jobs.
